

Cost-effective Medium Density Olive Oil Production

Wednesday, September 29, 2010
Forestville, CA

Presented by
University of California Cooperative Extension, Sonoma County

Australia has built a modern olive oil industry in less than two decades, producing high quality extra virgin olive oil both for domestic consumption and for export. Join Australian expert **Leandro Ravetti of Boundary Bend Limited**—Australia's largest olive oil producer—for a day of lecture and discussion about cost-effective medium density olive oil production. The class will cover the agronomic and economic pros and cons of different planting systems and densities, varietal selection, orchard design, irrigation, fertilizing, harvest and more.

8-8:30 am	Registration & coffee
8:30-12:30	Lecture, discussion, and olive oil tasting. Leandro Ravetti; UCCE farm advisors Carolyn DeBuse and Rachel Elkins ; and olive oil consultant Alexandra Devarenne
12:30-1:30	Lunch, provided
